Knob

Type VC.192, phenolic based (PF) Duroplast. Resistant to solvents, oils, greases and other chemical agents.

Colour

Black, glossy finish.

Plain stud

Zinc-plated steel.

Helical latch

Sintered and vaporized steel with hole for pinning.

DIN 1481 spring dowel pin

Black-oxide steel, DIA 0.12x0.79 (Ø 3x20 mm)(included in the supply).

Latch spring to compensate door thickness

Zinc-plated steel.

Standard executions

- D: opening to the right side
- S: opening to the left side
- VCK.: assembly on doors with thickness $S > 0.19$ (5 mm)
- VCK+G: assembly on doors with thickness $S \leq 0.19$ (5 mm) with the interposition of guide bush and nut (except type with $L = 0.94$ (24 mm)),

available also as accessory sold separately:
 code 15201 description GRUPPO GHIERA VCK.
 - guide bush: nickel-plated brass
 - nut: threaded M16x1, nickel-plated brass
 - DIN 6798 flat spring washer: zinc-plated steel.

Choice of the length of the stud (l)

$l \geq S+b+0.59$ (15 mm)

- S = thickness of the door
 - b = thickness of the ledge
- See assembly examples.

Assembly instructions

1. Drill a cylindrical assembly hole in the door following the instructions reported in the table.
 2. Drill a hole in the stud for pinning at a distance "f" from the knob following the instructions reported in the table.
 3. Fit the stud in the hole on the door and assemble the other components.
- VCK. latch-type knobs are supplied not assembled.

Door thickness	Execution	Mounting hole	f=Hole for pinning
S > 5 S > 0.20	VCK.	12 H9 0.51	f=S+b+8.5 f=S+b+0.33
S ≤ 5 S ≤ 0.20	VCK.+G	16 H9 0.63	f=S+b+11 f=S+b+0.43
